

The TAB Kids 3.1

Main Features

The TAB Kids 3.1 is the new version of the friendly and colorful software for kids to create animations and cartoons. It is so easy that any kid can use it with spectacular results, and yet it is powerful.

The TAB kids allows you to kick-start the creation of a cartoon thanks to its user-friendly interface based on graphical elements instead of menus and commands. Any task can be performed by simply operating on self-explanatory icons and buttons, and by following simple steps that come from the professional production workflow.

Draw

- Easy-to-use interface with icons and buttons
- Full set of drawing tools, including the brush to draw variable thickness lines
- Use stencils to draw shapes and text
- Model drawings by pinching, smoothing or pumping lines
- Paint your drawings with pattern, texture and other styles
- ★ Use sliders to customize the special styles like gradients and pattern
- Change the color in the palette with no need to repaint drawings

Compose

- Organize your scene in up to four layers
- ★ Duplicate drawings to create a copies that can be modified without affecting the original ones
- ★ Repeat quickly drawings to create an animation sequence
- Set animation by defining key position, size and rotation for your drawings

Finalize

- Check the animation by using the onion-skin mode
- Import a soundtrack to complete the animation
- ★ Add your own images and soundtracks to the libraries
- ★ Set the speed of the exported animation from slow to fast

Export

- Export as QuickTime clips
- Export in 3GP for mobile video output
- Export in Flash format for easy web publishing
- Print or save pictures from your animation

★ New or improved feature in the TAB Kids 3.1
